University of California, Irvine — Master of Computer Science — GPA: 4.0 [Irvine, CA] Sept 2023 – Dec 2024
Vellore Institute of Technology — B.Tech Computer Science and Engineering [Vellore, India] July 2016 – June 2020

SKILLS

Languages	Python, C#, PowerShell, SQL, Bash, JavaScript, Java, HTML
Auth & IAM	OAuth 2.0, OIDC, SAML, JWT, Entra ID, Okta, Conditional Access, PIM, RBAC, Zero Trust, JIT, MFA, FIDO2, Device Attestation
Platforms	Azure PaaS/IaaS, AKS, Kubernetes, Docker, Terraform, Microsoft Graph API, Azure DevOps, AWS S3/Lambda
Frameworks	CIS, NIST, MCSB, CISA, AI Security Governance, Red-teaming, Agent Identity, Non-human Access Patterns

EXPERIENCE

Deloitte — Senior Consultant — Cloud Infra & Security — Seattle, WA Jan 2025 – Present

- Architected and deployed a **centralized token issuance and identity validation service** using **MCP server on AKS**, enabling secure **OAuth 2.0 / Microsoft Graph API operations** across device and session contexts, reducing **identity investigation effort by 60%** and accelerating **incident response by 2x**
- Established **agent identities** as a first-class construct within the enterprise identity platform, implementing **non-human access patterns, service-to-service identity, and audit trails** for **Copilot Studio, Agent365, and Microsoft Foundry**, enabling **compliant agentic AI adoption across 5+ business units** with **45% reduction in AI security risks**
- Led **Okta-to-Microsoft Entra ID migration** for **2,000+ enterprise applications and 120K+ identities**, implementing **SAML, OIDC, and OAuth 2.0 modern auth standards, Conditional Access policies, PIM, and risk-based authentication**, improving **executive visibility** and reducing **migration effort by 50%**
- Spearheaded rollout of **Microsoft Entra External ID** with **JIT migration, MFA, Native Authentication, WAF, and device attestation**, enabling **secure external identity onboarding for 50K+ users** and reducing **auth-related security incidents by 35%**
- Developed **IDP migration accelerators** replicating **applications, users, groups, and policies** across **Entra ID tenants**, accelerating **identity modernization timelines by 76%** and reducing **manual migration effort by 70%**

University of California, Irvine — Data & Tech Fellow — Prof. Tom Andriola — Irvine, CA Jan 2024 – Dec 2024

- Engineered **hybrid identity infrastructure** with **Application Proxy, Entra ID Connect, OIDC/SAML federation, F5 load balancing, firewall, DNS routing, and HRD policies** for seamless **cross-domain authentication**

ZS Associates — Associate Consultant Intern — Cloud & Big Data — Philadelphia, PA Jun 2024 – Aug 2024

- Converted **3,000 Parquet tables to Delta tables** using **Apache Spark and Databricks**; reduced cluster runtime **14%** via custom Docker image with preinstalled packages; set up **Azure Data Factory pipelines** and **Azure Key Vault** integration for secrets management
- Managed **IAM for Databricks workspaces** using **Microsoft Entra ID (Azure AD)**, configuring **SCIM provisioning, federated SSO (SAML/OIDC), and Unity Catalog** for **fine-grained RBAC, attribute-based access control, and audit logging** across multi-workspace environments — enforcing **least-privilege non-human service principal access** for automated pipelines

Deloitte — Cyber Security Solution Advisor — Cloud Infrastructure — Gurugram, India Aug 2020 – Sep 2023

- Architected and deployed **Zero Trust security** across **Azure**, implementing **identity-based access controls, RBAC, Conditional Access, PIM, identity lifecycle management, and delegated access flows** for **human and non-human identities** at enterprise scale
- Engineered an **Automated Multi-Cloud Security Assessment Tool** evaluating cross-tenant resources and identities against **NIST/CIS frameworks** using **Microsoft Graph API and PowerShell**, reducing manual efforts by **78%** and improving risk detection by **35%**
- Overhauled **IAM for PaaS Databases and Kubernetes Clusters**, automating **Azure AD group creation, RBAC role mapping, and service-to-service identity** based on config-driven rules; designed **Secure SSO system** (OAuth 2.0/SAML, Redis Cache, Application Gateway) supporting **managed device trust models**
- Built **Azure DevOps extension** to pre-scan **Terraform templates** for IAM misconfigurations and security policy violations, and developed **ETL pipelines** with **Azure Synapse/SQL** and **Power BI** governance dashboards

CERTIFICATIONS
