University of California, Irvine — Master of Computer Science — GPA: 4.0 [Irvine, CA, USA] Sept 2023 - Dec 2024
Vellore Institute of Technology — B.Tech Computer Science and Engineering [Vellore, India] July 2016 - June 2020

SKILLS

Languages	Python, C#, PowerShell, Bash, JavaScript, Swift, SQL
AI & Full-Stack	LLM Deployment (Copilot Studio, Microsoft Foundry, Agent365), Agentic Workflows, Red-Teaming, Model Guardrails, RAG, Django, REST APIs, Azure Functions, Cosmos DB, Redis Cache
Cloud & DevOps	Azure (AKS, Key Vault, Entra ID, Event Hubs, VMSS), AWS (S3, Lambda), Docker, Kubernetes, Terraform, GitHub Actions, Azure DevOps, Databricks, Power BI

EXPERIENCE

Deloitte — Engineering Manager — [Cloud Infra and Security Team](#) — [Seattle, WA](#) Jan 2025 - Present

- Led **end-to-end deployment of AI-driven enterprise workflows and Copilot agents** for **150K+ users** across Share-Point, Outlook, and Teams — owned scoping, system design, build, and production rollout, embedding directly with customer engineering teams to drive adoption and reduce **manual operational effort by 40%**
- Built and shipped an **MCP server on AKS** integrated with **Microsoft Graph API** — prototyped, scoped tradeoffs between speed and quality, and deployed to production with OIDC workload identity and Key Vault secrets management, reducing **identity investigation effort by 60%** and accelerating **incident response by 2x**
- Implemented **AI security governance frameworks** using **red-teaming agents, model guardrails, Agent365, and policy-driven monitoring** — fed **eval-driven field feedback** on model and agent behavior back to platform and product teams, directly influencing AI roadmap decisions across 5+ business units
- Developed **Python and PowerShell tooling** to automate identity migration and RBAC analysis across Entra ID — codified working patterns into reusable accelerators, reducing **manual effort by 70%** across 2,000+ applications and 120K+ identities
- Deployed **Microsoft Entra External ID** with JIT migration, MFA, Native Authentication, WAF, and alerting — embedded with customer security and ops teams to scope requirements, sequence delivery, and remove blockers, enabling onboarding for **50K+ users** and reducing **auth incidents by 35%**
- Rolled out **enterprise-wide Copilot Studio and Microsoft Foundry** across 5+ business units — scoped deployment phases, made tradeoffs between pilot breadth and production stability, and codified deployment playbooks adopted across subsequent rollouts

ZS Associates — Associate Consultant Intern — [Cloud and Big Data Team](#) — [Philadelphia, PA](#) Jun 2024 - Aug 2024

- Scoped and delivered a **cloud data platform overhaul** — converted 3,000 Parquet tables to Delta Lake using Spark and Databricks, built a **hardened Docker image** via Artifactory reducing runtime by **14%**, and shipped Unity Catalog governance end-to-end in a fast-moving, ambiguous environment
- Built **Azure Data Factory pipelines and Azure Key Vault integration** for secure, governed data ingestion — scoped the solution, sequenced delivery across teams, and removed blockers to hit production milestone ahead of schedule

University of California, Irvine — Data & Tech Fellow — [Prof. Tom Andriola](#) — [Irvine, CA](#) Jan 2024 - Dec 2024

- Built an **Apple Vision OS remote development platform** in **Swift** (SSH tunneling, VS Code Server, sandboxed execution) — designed for rapid-iteration research workflows, shipped from prototype to production with secure credential management and network isolation, presenting measurable workflow impact to senior academic stakeholders
- Designed and deployed **hybrid identity infrastructure** (Entra ID Connect, OIDC, Application Proxy, F5, DNS) — embedded with IT, security, and operations teams to gather requirements, debugged authentication flows end-to-end, and shipped fixes validated through code review
- Served as **technical advisor to the VP of IT and CIO** — communicated design decisions, scoped tradeoffs under ambiguity, and guided adoption across a multi-vendor university environment

Deloitte — Cyber Security Solution Advisor — [Cloud Infrastructure Team](#) — [Gurugram, IN](#) Aug 2020 - Sep 2023

- Built an **Automated Multi-Cloud Security Assessment Tool** in **Python** — scoped, built, and shipped end-to-end, reducing manual effort by **78%** and improving risk detection by **35%** across multi-tenant enterprise environments
- Designed and deployed **Azure full-stack platforms**: Video Conferencing (VMSS, App Service, Cosmos DB) and Secure SSO System (Redis Cache, Application Gateway) — built backend, infrastructure, and auth layers from prototype to live operations, managing scope and quality tradeoffs throughout delivery
- Developed an **Azure DevOps IaC scanning extension in Python** — built, shipped, and iterated end-to-end from Terraform static analysis to automated CI/CD remediation; codified the pattern into a reusable tool and fed deployment friction insights back to the practice to drive systemic improvements across client engagements

CERTIFICATIONS
