University of California, Irvine — Master of Computer Science — GPA: 4.0 [Irvine, CA, USA] Sept 2023 - Dec 2024
Vellore Institute of Technology — B.Tech Computer Science and Engineering [Vellore, India] July 2016 - June 2020

SKILLS

Languages/Scripts	Python, C#, ASP .Net, PowerShell, SQL, Bash, YAML, Java, JavaScript
IaC & DevOps	Terraform, Bicep, GitHub Actions, GitHub Copilot, GHAS, Azure DevOps, Jenkins, Docker, Kubernetes (AKS, GKE), Artifactory, CI/CD Pipeline Design, Agile (Scrum, Kanban)
Cloud Platforms	Azure (PaaS/IaaS: Storage, Function Apps, Web Apps, Event Hubs, Service Bus, Log Analytics, VMSS, AKS, Container Instances, SQL, Cosmos DB, Key Vault), GCP (GKE, BigQuery, Google Workspace), AWS (S3, Lambda)
Monitoring & Cost	Dynatrace, Grafana, Datadog, Azure Monitor, Log Analytics, Power BI, Cloud Cost Optimization, SLA Tracking, Resource Trend Reporting, Vulnerability Management, CSPM

EXPERIENCE

- Deloitte** — Senior Consultant — Cloud Infra and Security Team — Seattle, WA

Jan 2025 - Present

 - Architected and deployed **fully automated IaC solutions** using **Terraform and Bicep** across **Azure PaaS and IaaS environments**, enforcing **enterprise-wide cloud platform standards** for security, cost, and compliance across **5+ business units and 150K+ users**
 - Built and maintained **CI/CD pipelines** using **GitHub Actions and Azure DevOps**, integrating **GitHub Advanced Security (GHAS)** and **automated IaC compliance scanning** to enforce standardized security tooling across all deployment workflows
 - Onboarded **2,000+ enterprise applications and 120K+ identities** into **cloud IaC environments**, providing **technical support at design and operational phases** and resolving cloud configuration, networking, and identity issues within defined SLAs
 - Implemented **cloud monitoring and observability** using **Azure Monitor, Log Analytics, and Power BI dashboards**, producing **periodic reports on resource usage, cost trends, and platform performance** to guide strategic architecture decisions
 - Developed an **MCP server on Azure Kubernetes Service (AKS)**, troubleshooting **networking, configuration, and infrastructure issues** across containerized workloads and collaborating with cross-functional platform and application teams to maintain SLA adherence
 - Led **cross-functional working groups** across delivery and platform teams, driving **cloud cost optimization initiatives** and establishing **secure-by-default IaC guardrails and cloud platform standards** based on cost, capability, and capacity requirements
- ZS Associates** — Associate Consultant Intern — Cloud and Big Data Team — Philadelphia, PA

Jun 2024 - Aug 2024

 - Overhauled **ETL workflows** by converting **3,000 Parquet tables to Delta tables** using **Apache Spark and Databricks**, leveraging **Azure Data Factory pipelines** and **BigQuery-compatible data patterns** to enhance scalability and cloud platform efficiency
 - Designed and published a **hardened custom Docker image** for Databricks clusters via **Artifactory**, reducing cluster runtime by **14%** by eliminating runtime package installations and standardizing the cluster build across value streams
 - Implemented **Unity Catalog** in Databricks for **unified data governance**, using **Azure Key Vault and ADLS fine-grained access controls** to enforce compliance; produced **Grafana dashboards** tracking data pipeline health and resource utilization trends
- University of California, Irvine** — Data & Tech Fellow — Prof. Tom Andriola — Irvine, CA

Jan 2024 - Dec 2024

 - Engineered **hybrid cloud infrastructure** using **Terraform IaC**, deploying **Application Proxy, Entra ID Connect, F5 load balancing, firewall, and DNS routing** — troubleshooting cloud networking, configuration, and authentication issues across the enterprise platform
 - Built an **Apple Vision OS remote development platform** (SwiftUI, SSH, VS Code Server) running on **Azure-hosted infrastructure**, collaborating with application and platform teams to maintain **stable cloud environments** and resolve incidents within agreed SLAs
 - Produced **technical documentation and architecture presentations** for stakeholders at all organizational levels, communicating cloud platform design decisions, infrastructure standards, and implementation guidance in both **Agile sprint reviews and executive briefings**

- Designed and deployed **fully automated cloud solutions** on Azure (VMSS, AKS, App Service, Cosmos DB, Redis Cache, Event Hubs) using **Terraform IaC and Azure DevOps pipelines**, supporting enterprise workloads across **IaaS, PaaS, and SaaS** configurations
- Developed an **Azure DevOps extension to pre-scan Terraform IaC templates** for misconfigurations and policy violations before deployment, integrating findings into **Power BI dashboards** for resource trend reporting and stakeholder-facing cost and compliance summaries
- Analyzed **cloud usage patterns and cost trends** across multi-cloud environments, producing **periodic reports and Grafana/Power BI dashboards** to guide **strategic architecture decisions** and drive **cloud cost optimization initiatives** across client organizations
- Onboarded enterprise value streams into **cloud IaC environments**, providing **technical support at design and operational phases**, troubleshooting **cloud service, networking, and configuration issues**, and maintaining **platform SLA adherence**
- Built **ETL workflows** with **Azure Synapse, Azure SQL, and Azure Data Factory**, maintaining **working knowledge of Google and Azure platform services** and collaborating cross-functionally with application, infrastructure, and security teams
